## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-3, drawn to workpiece-transfer device with a product-housing section and a material-housing section, classified in class 414, subclass 796.9.
  - II. Claims 12-18, drawn to workpiece-transfer device with a plurality of suction pads, classified in class 83, subclass 152.
- 2. The inventions are distinct, each from the other because of the following reasons: Invention of Groups I and II are related as separate inventions. They are distinct because the inventions of Group I does not require the specific details of suctions pads of Group II for patentability as evidenced by the omission thereof from Group I and the invention of Group II does not require the specific details of the product-housing section and the material-housing section of Group I for patentability as evidenced by the omission thereof from Group II.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
